

Re: Castlewood Apparel Personal Protective Equipment Supply Program

To Whom it May Concern:

Castlewood Group is an apparel manufacturer with offices across the United States and overseas. The Castlewood Group designs, manufactures and sells mens, ladies, boys and girls apparel to over 200 retailers operating more than 10,000 stores worldwide. Due to the outbreak of COVID-19, we recently converted many of our apparel factories into PPE facilities and have shifted a substantial amount of our company's energy and focus to delivering various masks, hand sanitizers, gloves, wipes and other PPE to essential workers and our customers serving the frontlines of the pandemic. We are currently supplying PPE to various retail chains, supply distributors, government agencies and other commercial customers to meet their supply requests.

We would love to discuss how to help serve you and your communities in the fight to contain the coronavirus. Given our large manufacturing infrastructure overseas, we have very aggressive pricing and lead times for many types of product, and would love the opportunity to review what we offer, both made-to-order and in stock.

We look forward to hearing back from you soon, and take care!

Best regards,

The Castlewood Team
